

## City of Jacksonville (Florida) Duval County Courthouse

# PROGRAM SUMMARY

**Location**

Jacksonville, Florida, USA

**Project Type/Role**

Owner's Representative/Advisor

**Total Investment**

\$232 Million

**Role**

Work Closely with the City of Jacksonville to Manage Project Design, the Budget, and Establish an Execution Plan to Deliver the Project

### Highlights/Overview

The City of Jacksonville is responsible to manage the design and construction of a new county courthouse.

When this project was trending excessively over budget and schedule, Global Performance was asked to conduct a project audit and make recommendations on a path forward for the project.

We have established a close relationship with the City, and together we have developed a plan that is bringing this project within budget and schedule targets. This has required an extensive effort in project analysis, both in scope and procedures.

In addition, we have reviewed the project structure and made recommendations to the City on changes that should be made to have a successful project.

All of this has been within a four-month timeframe with excellent results.

Our relationship with the City has grown through this process, and we look forward to providing additional support to them as needed.
